

Melville Douglas STANLIB Balanced Fund

Fund information update at 31 December 2024

What is the fund's objective?

The objective of the fund is to deliver high growth of capital and income, a reasonable level of current income and relative stability for capital invested to obtain long term wealth accumulation.

What does the fund invest in?

The fund is an actively managed multi-asset class mandate designed to reflect Melville Douglas's optimal long-term capital growth strategy. The fund focuses on delivering balance between investment returns and the risk associated with those returns, between capital growth and cash generation and balance between compound and cyclical price performers. The maximum equity effective exposure (including international equity) will not exceed 75% of the market value of the portfolio.

What possible risks are associated with this fund?

General market risks include a decline in property values, share price volatility, a change in interest rates and economic conditions. Where foreign securities are included in the portfolio there may be additional risks, such as potential constraints on liquidity and the repatriation of funds, macro-economic risks, political risks, tax risks, settlement risks, and potential limitations on the availability of market information.

Cost ratios (annual) including VAT as at 30 September 2024

| | Class B1 |
|--------------------------------|------------|
| Based on period from: | 01/10/2021 |
| Total Expense | 1.29% |
| Transaction Costs | 0.08% |
| Total Investment Charge | 1.37% |
| 1 Year Total Expense | 1.30% |

Total Expense (TER): This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

Transaction Costs (TC): This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

Total Investment Charges (TIC): This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Fund review

Over the quarter, the Balanced Fund delivered a return of 1.3%, ahead of its ASISA SA MA High Equity benchmark return of 1.5%. Offshore assets outperformed domestic assets handsomely over the quarter and contributed positively to the absolute return of the fund.

Market overview

Global equity markets soared in 2024, fueled by a confluence of favourable economic factors. Lower inflation eased cost pressures, allowing businesses to operate more efficiently, and boosting consumer purchasing power. Simultaneously, a synchronised global interest rate cutting cycle made borrowing cheaper, encouraging investment and spending across various sectors. The strong performance of the US economy played a pivotal role in this upward trend. Robust job growth, rising wages, and resilient consumer confidence fueled by the positive wealth effect have underpinned economic stability and expansion. This has not only bolstered domestic markets but also had a ripple effect globally, enhancing investor sentiment and market performance worldwide. In South Africa, economic activity in 2024, began on a subdued note, with real GDP contracting by 0.1% in the first quarter. However, as the year progressed, we observed a gradual and steady recovery, with GDP growing by 0.4% in the second quarter. In the third quarter, GDP contracted by 0.3% primarily due to a reported 28.8% decline in agricultural output. Looking ahead, we anticipate a gradual uplift in GDP growth. Headline inflation for November remained below the SARB target rate of 3-6% for the second consecutive month at 2.9%. Despite this improved inflation outlook, the South African Reserve Bank maintained a cautious stance in their monetary policy, cutting the repo rate by 25bps in November, citing an uncertain global political and inflation backdrop. Looking ahead, we expect the SARB to implement a further 50bps cut in 2025.

Looking ahead

As we reflect back on a highly volatile year, we acknowledge i) the affirmation of South Africa's democracy through the formation of the Government of National Unity; ii) an economic recovery driven by initiatives under Operation Vulindlela and iii) the commencement of monetary easing. We now look to the future with renewed optimism; however, we remain acutely aware of the challenges that persist. Emerging Market investors currently hold an underweight position to MSCI SA. However, we expect a shift in this allocation due to the improved economic outlook in SA. This could result in an uptick in valuations, given that SA is currently trading at an unusual discount to the MSCI EM peer group. We expect bonds to continue generating better returns over the next year. The outlook for global equity remains supportive, with strong earnings growth expected in 2025. Although Global equity valuations are not attractive compared to history, but this is predominantly a function of the value assigned to high earnings growth sectors/stocks in the US, we remain constructive that global equities in the Fund. They provide investors diversification and the opportunity to invest in stocks and sectors that have secular growth drivers.

The fund is adequately diversified across geographies and asset classes and is well positioned to navigate the complexities of the market. We remain committed to our fundamental approach, ensuring that our investment strategies are well-positioned to capitalise on opportunities and manage risks effectively.

All performance returns and ranking figures quoted are shown in ZAR and are based on data sourced from Morningstar or Statpro and are as at 31 December 2024.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for periods of 1 year or longer, where no value is shown no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).
